1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figures 8, 9, 10 and 11 are disclosed by applicant in the Brief Description of the Drawings as being conventional, but the Figures themselves are not labeled as "Prior Art". Applicant is required to label Figures 8, 9, 10 and 11 as "Prior Art". See MPEP 608.02(g).

Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

2. As a matter of claim construction, the part that is masked in instant claim 2 is taken as being a positive limitation of the claims. The claim is taken as being to a combination of a mask and a part that is masked. As a further matter of claim construction in claim 2, the language "said second side of the part to cover the circumference of the second side end of the hole to protect against paint mist invading the hole from the second side end of the hole", is taken as meaning that the hollow flange has a solid surface which covers the area of the second side hole, as well as being greater than and covering the circumference of the hole. Support for this construction is found at page 8, second paragraph, where "the flange (13A) is taught as protecting said part from said circulating paint mist....entering said female screw hole (22a)." The flange is shown in instant Figure 2 as covering the area of the end of the

second side hole, and would have to have this structure in order to prevent paint mist on the second side of the part, from entering the second side hole, as is now claimed.

3. The following is an examiner's statement of reasons for allowance: the limitations of the paint mask having a hollow flange of greater circumference than the second side hole circumference and preventing paint mist from invading the hole from the second side hole in combination with the other limitations of claim 2 define over the cited art. Kano et al. does not teach a hollow end flange, while Duggan does not cover the area of the second side hole opening with a flange, and applicant's prior art admission in instant Figures 9, 10 and 11 does not teach a flange with extends past and covers the circumference of the second side hole opening. There is no motivation to transfer features among these references to arrive at the instant claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time.
